

# ABHINAV KV

## MERN STACK DEVELOPER

### CONTACT

-  7558916062
-  abhinavkvmayyil@gmail.com
-  Mayyil, Kannur, Kerala
-  <https://github.com/AbhinavKV369>

### SKILLS

#### Programming Languages

- JavaScript (ES6+)

#### Frontend Development

- React.js
- HTML5, CSS3
- Component-based UI development
- Form handling & validation
- Responsive design

#### Backend Development

- Node.js
- Express.js
- RESTful API development
- JWT-based authentication
- Role-based access & protected routes

#### Database & Data Handling

- MongoDB
- Mongoose
- Schema design

#### Full-Stack Integration

- Frontend-Backend integration using Axios
- API consumption & error handling

#### Tools & Development Practices

- Git & GitHub (version control)
- Debugging using console logs & documentation
- Clean code practices
- AI-assisted development with strong understanding

### PROFILE

Motivated MERN Stack Developer (Fresher) experienced in creating end-to-end web applications using React, Node.js, Express, and MongoDB. Proven ability to build secure authentication systems, dynamic dashboards, and REST APIs while following clean coding practices. Quick to learn new technologies and eager to work in a startup or SaaS-driven team where innovation, ownership, and growth are valued.

### PROJECT EXPERIENCE (MAKBIG LEARN)

#### Movie Booking Platform

- Developed a frontend for movie booking application with React-based UI and responsive design
- <https://knrfilmcity.vercel.app/>
- <https://github.com/AbhinavKV369/Movie-Booking-App-MERN-Frontend>

#### Vehicle Selling Platform (Node.js, Express, EJS, MongoDB)

- Developing a full-stack vehicle selling web application using Node.js, Express, EJS, and MongoDB
- Implemented vehicle listing, search, cart, wishlist, and checkout system
- Built complete order management flow including order placement, cancellation, and replacement
- Integrated invoice generation and email verification for user authentication and order confirmation
- Developed a secure admin panel for managing vehicles, users, orders, and coupons
- Implemented discount and coupon system to support promotional pricing
- Added data visualization (pie charts) in the admin dashboard for sales and order analytics
- Designed backend logic with JWT-based authentication and role-based access control
- Focused on clean MVC structure, scalable APIs, and real-world business logic
